

A PAIR OF ACES FOR INJURY AND VIOLENCE PREVENTION WEBINAR 2:

USING AND FINDING DATA AND ENGAGING WITH PARTNERS

JANUARY 10, 3:00-4:30 EST

A PAIR OF ACES FOR INJURY AND VIOLENCE PREVENTION WEBINAR *SERIES*

- LISTEN TO WEBINAR 1, INTRODUCING THE PAIR OF ACES TO INJURY AND VIOLENCE PREVENTION AT THIS LINK [HTTPS://BIT.LY/2BRVFML](https://bit.ly/2BRVFML)
- TUNE IN TO WEBINAR 3: APPLYING PAIR OF ACES TO INJURY PREVENTION PRACTICE FEBRUARY 14, 3-4:30 EST

TECHNICAL NOTES AND LOGISTICS

- THIS WEBINAR IS BEING RECORDED
- THE SLIDES AND RECORDING WILL BE MADE AVAILABLE TO REGISTERED ATTENDEES
- PLEASE ENTER YOUR QUESTIONS IN THE CHAT BOX AS THEY OCCUR TO YOU. WE WILL ANSWER THEM AS TIME PERMITS.
- PLEASE CALL IN USING YOUR TELEPHONE AND PLACE YOURSELF ON MUTE. PARTICIPANTS WILL ONLY BE ABLE TO LISTEN TO PRESENTERS, BUT CAN INTERACT VIA THE CHAT BOX.

Director of Community Based
Interventions for Alive and Well
Communities.

Adverse Childhood Experiences: Using Data to Inform Prevention Action

Katie A Ports, PhD

Pair of ACEs Webinar: January 10, 2019

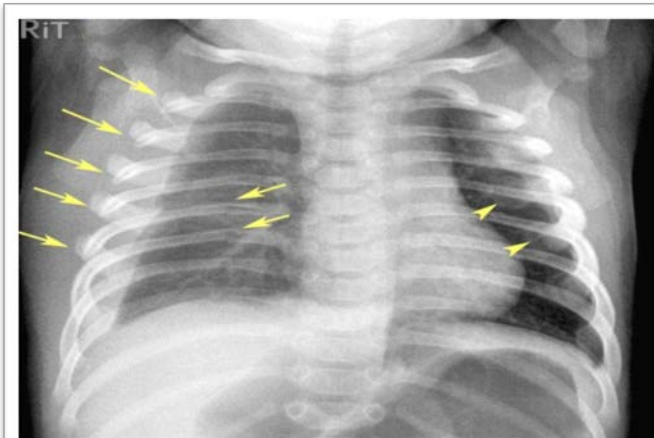

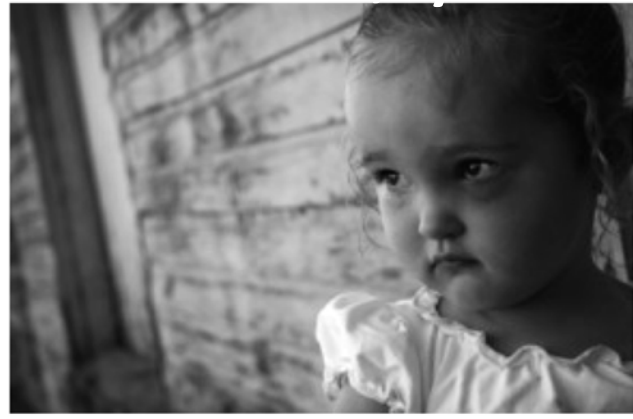

A young girl with dark hair in a ponytail, wearing a white school shirt and a dark skirt, is focused on writing on a chalkboard. The chalkboard has some writing on it, though it's not clearly legible. In the background, other students are visible, some sitting at desks and others standing. The lighting is warm, with a soft glow from the left side of the frame.

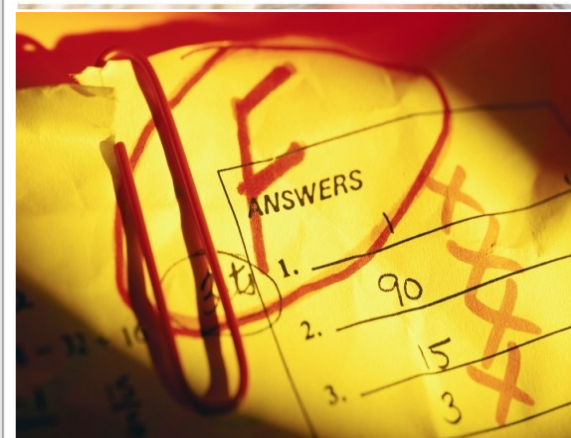

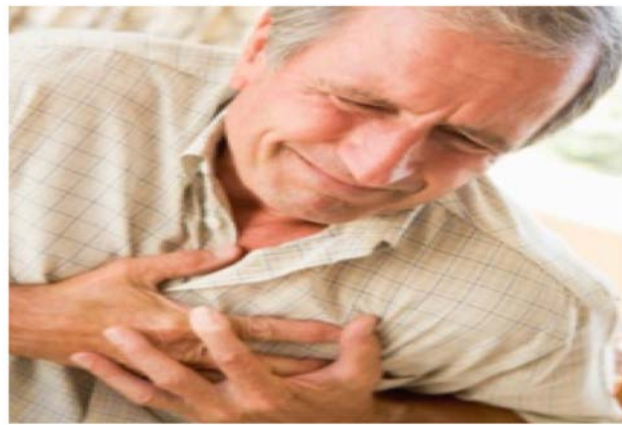

..... *the issue*

1 BILLION
CHILDREN EXPERIENCE
VIOLENCE ANNUALLY

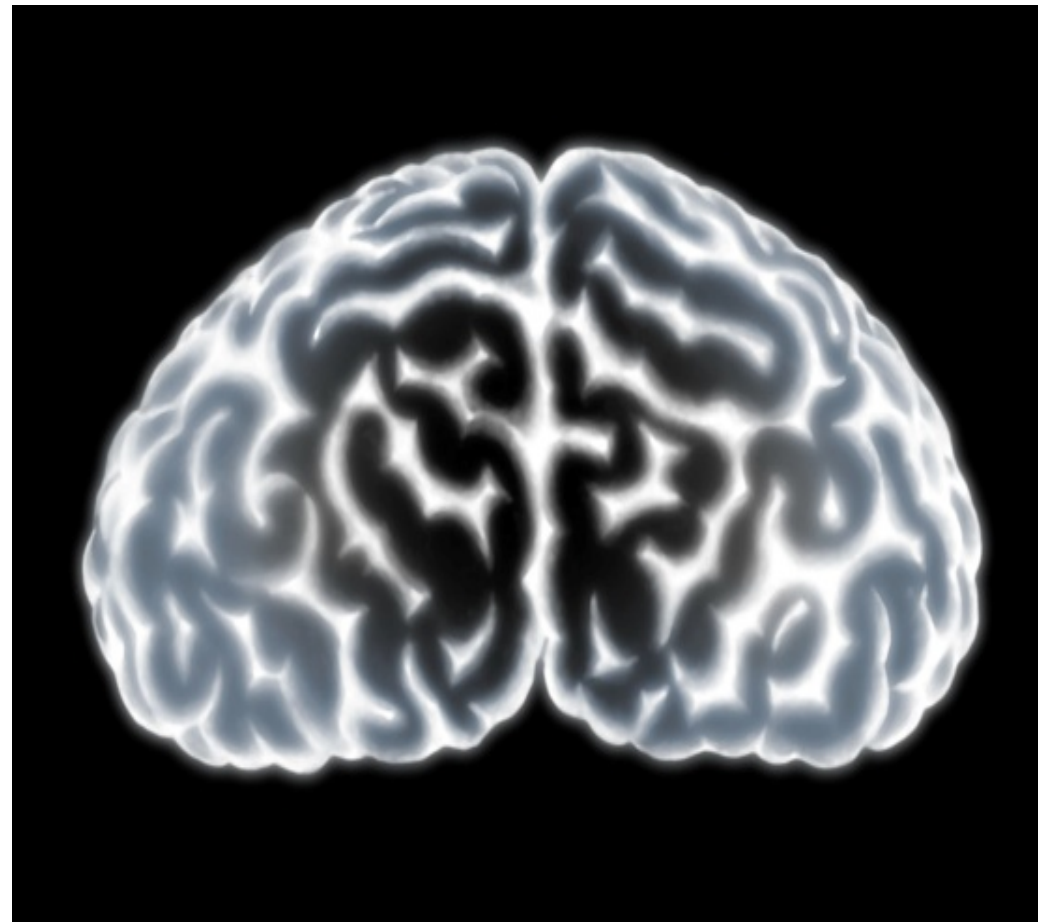

When you think of children's exposure to violence, you might picture this...

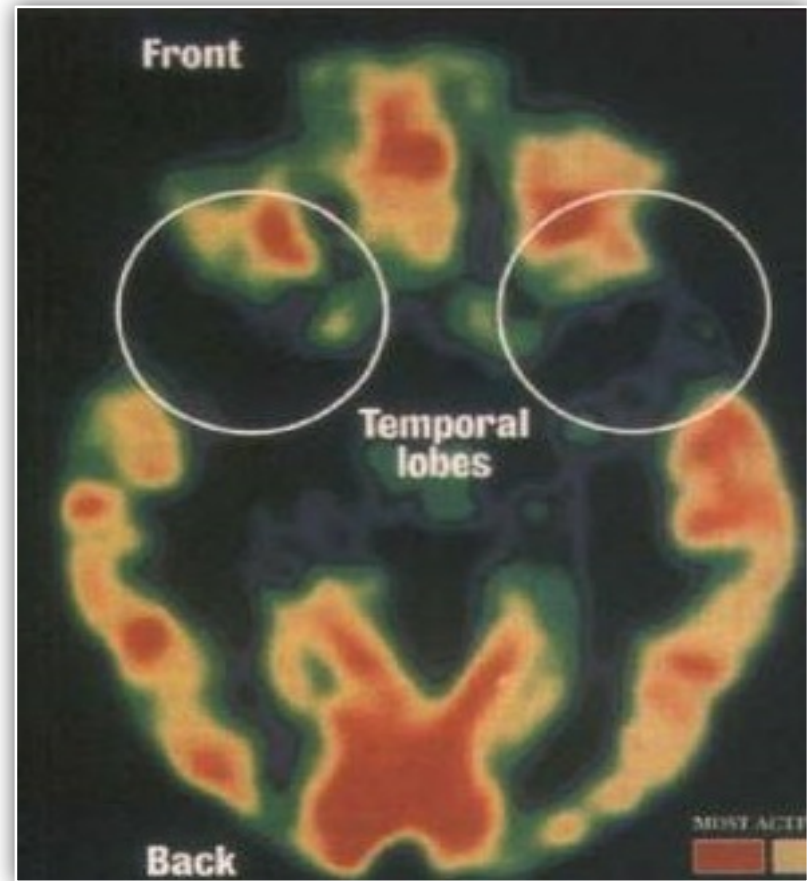

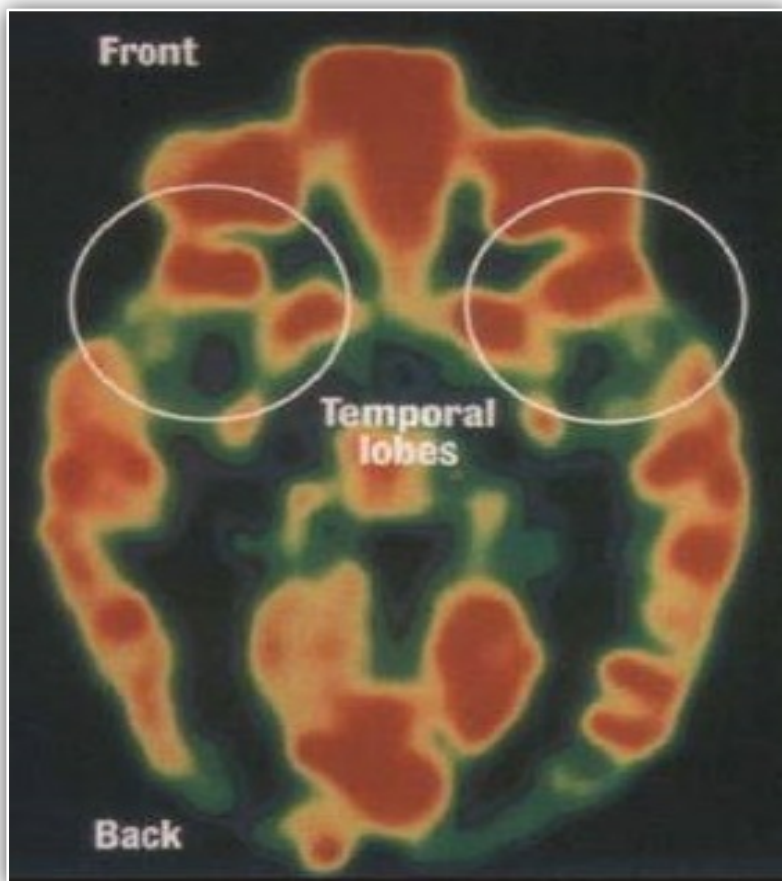

...but probably not this

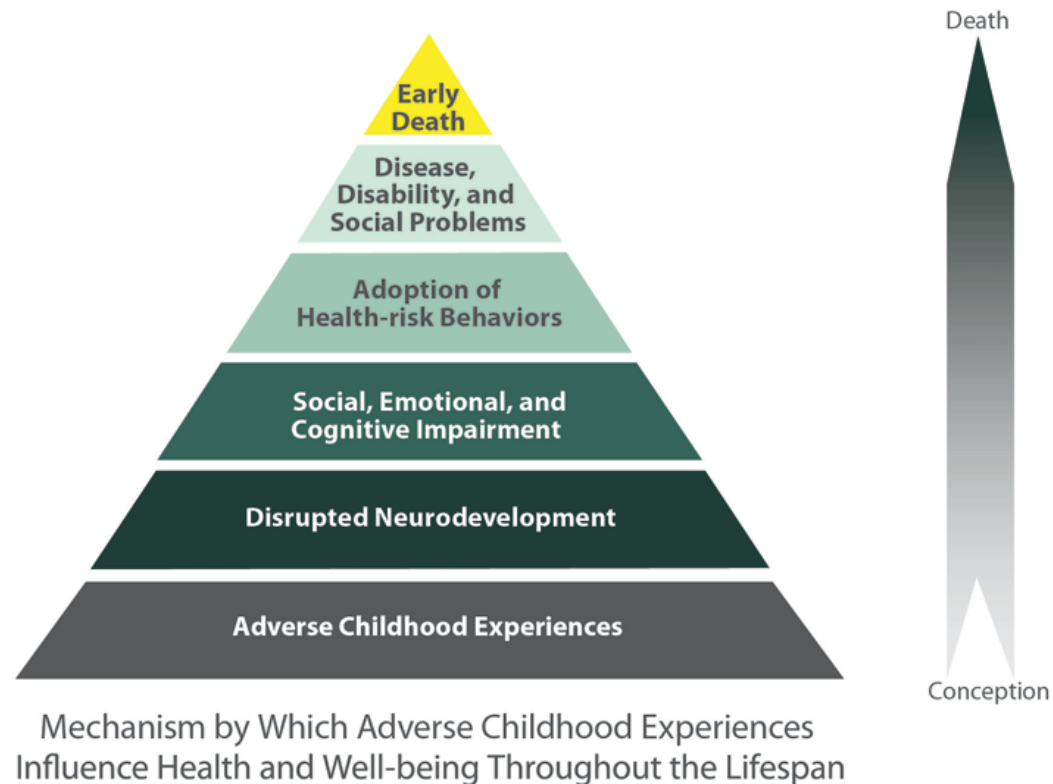

Building Brain Architecture

Violence Compromises Early Brain Development

Violence Compromises Early Brain Development

Adverse Childhood Experiences:

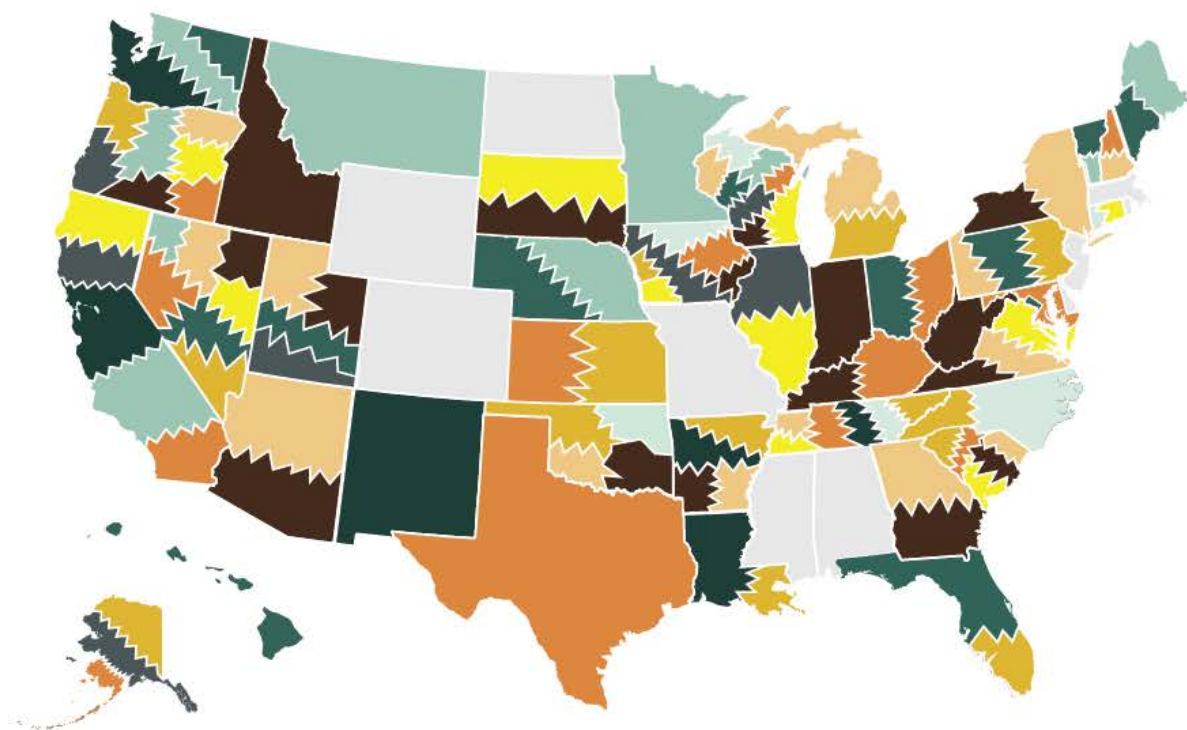

ACES not included in the traditional measure:

- Bullying
- Out of home placement
- Poverty
- Witness violence in community or school
- Racism
- Death of a parent
- Historical trauma

Although the study ended in 1997, some states are collecting information about ACEs in their population through the Behavioral Risk Factor Surveillance System (BRFSS).

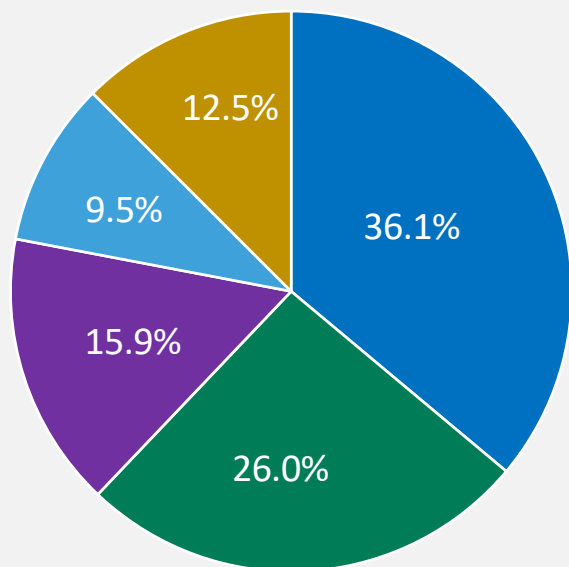

The ACE Study Continues...

Behavioral Risk Factor Surveillance System (BRFSS)

- Health-related telephone surveys that collect state data about U.S. residents
- Three parts:
 1. the core component: fixed core, rotating core, and emerging core
 2. optional modules, and
 3. state-added questions

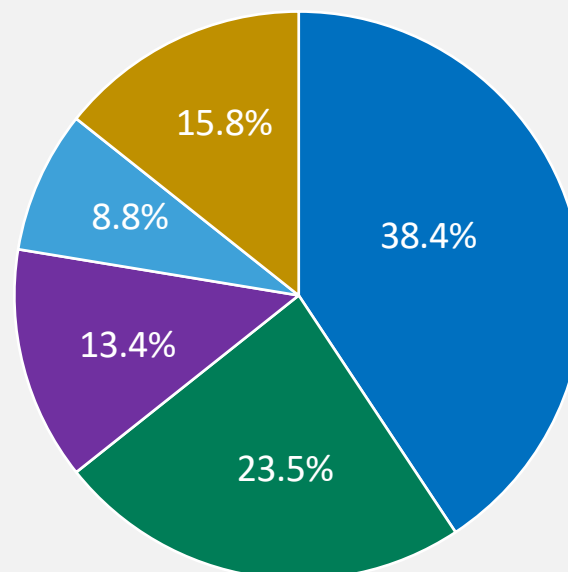

How Common are ACEs?

ACEs in Children & Adolescents

ACEs in Children & Adolescents

Required citation: Child and Adolescent Health Measurement Initiative. Data Resource Center for Child and Adolescent Health. 2016 National Survey of Children's Health (NSCH) data query. Retrieved [mm/dd/yy] from www.childhealthdata.org. CAHMI: www.cahmi.org.

ACES can have lasting effects on....

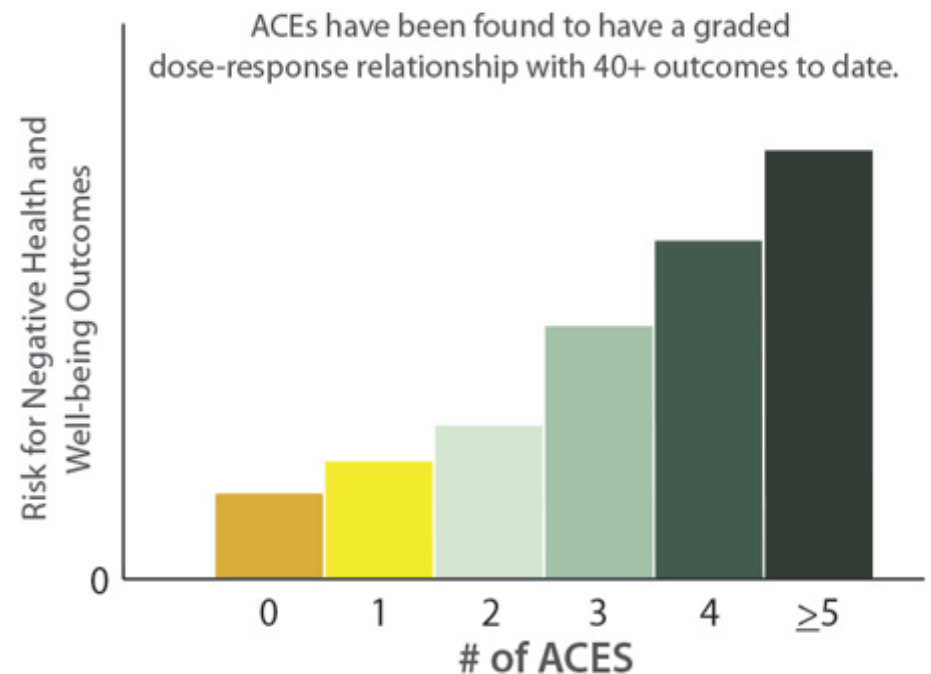

Health (obesity, diabetes, depression, suicide attempts, STDs, heart disease, cancer, stroke, COPD, broken bones)

Behaviors (smoking, alcoholism, drug use)

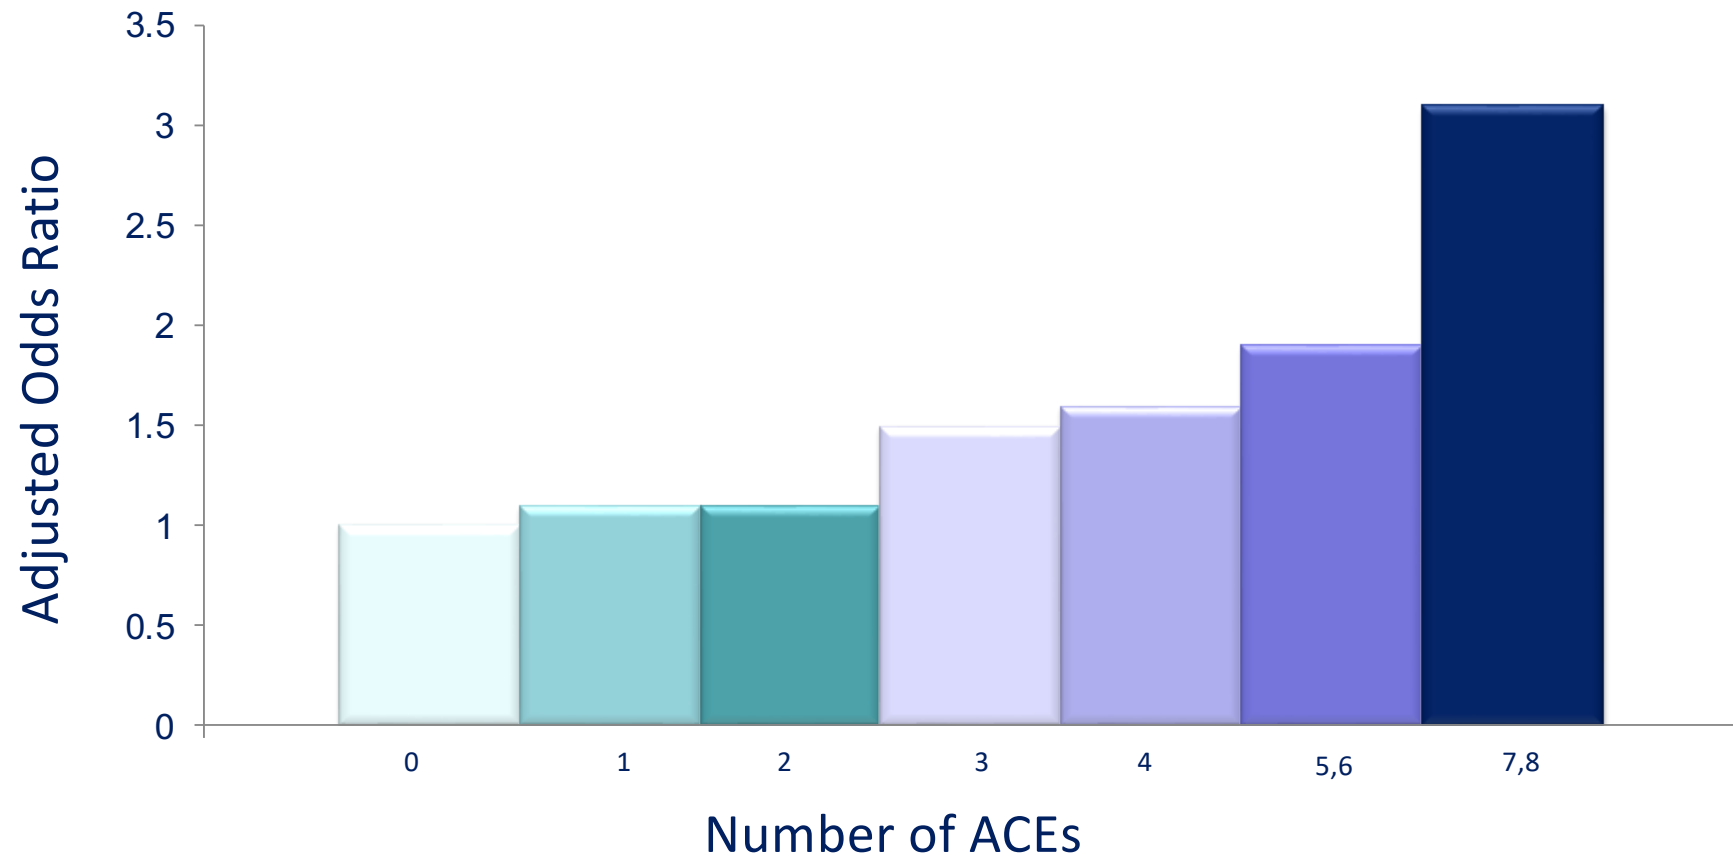

Life Potential (graduation rates, academic achievement, lost time from work)

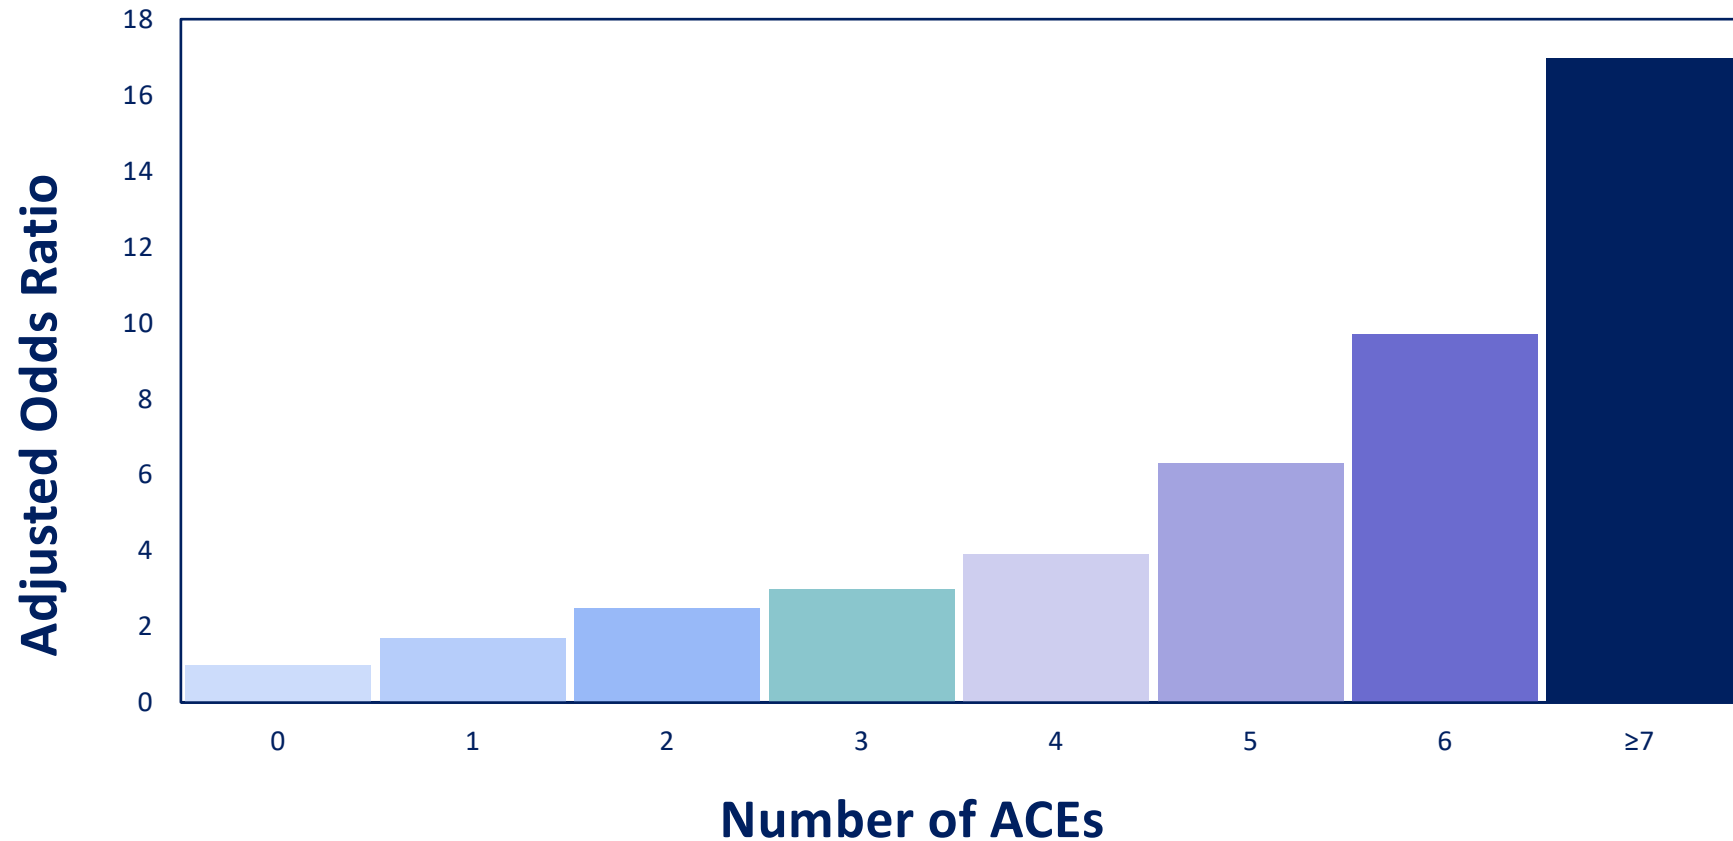

*This pattern holds for the 40+ outcomes, but the exact risk values vary depending on the outcome.

ACE Score and Cardiovascular Disease

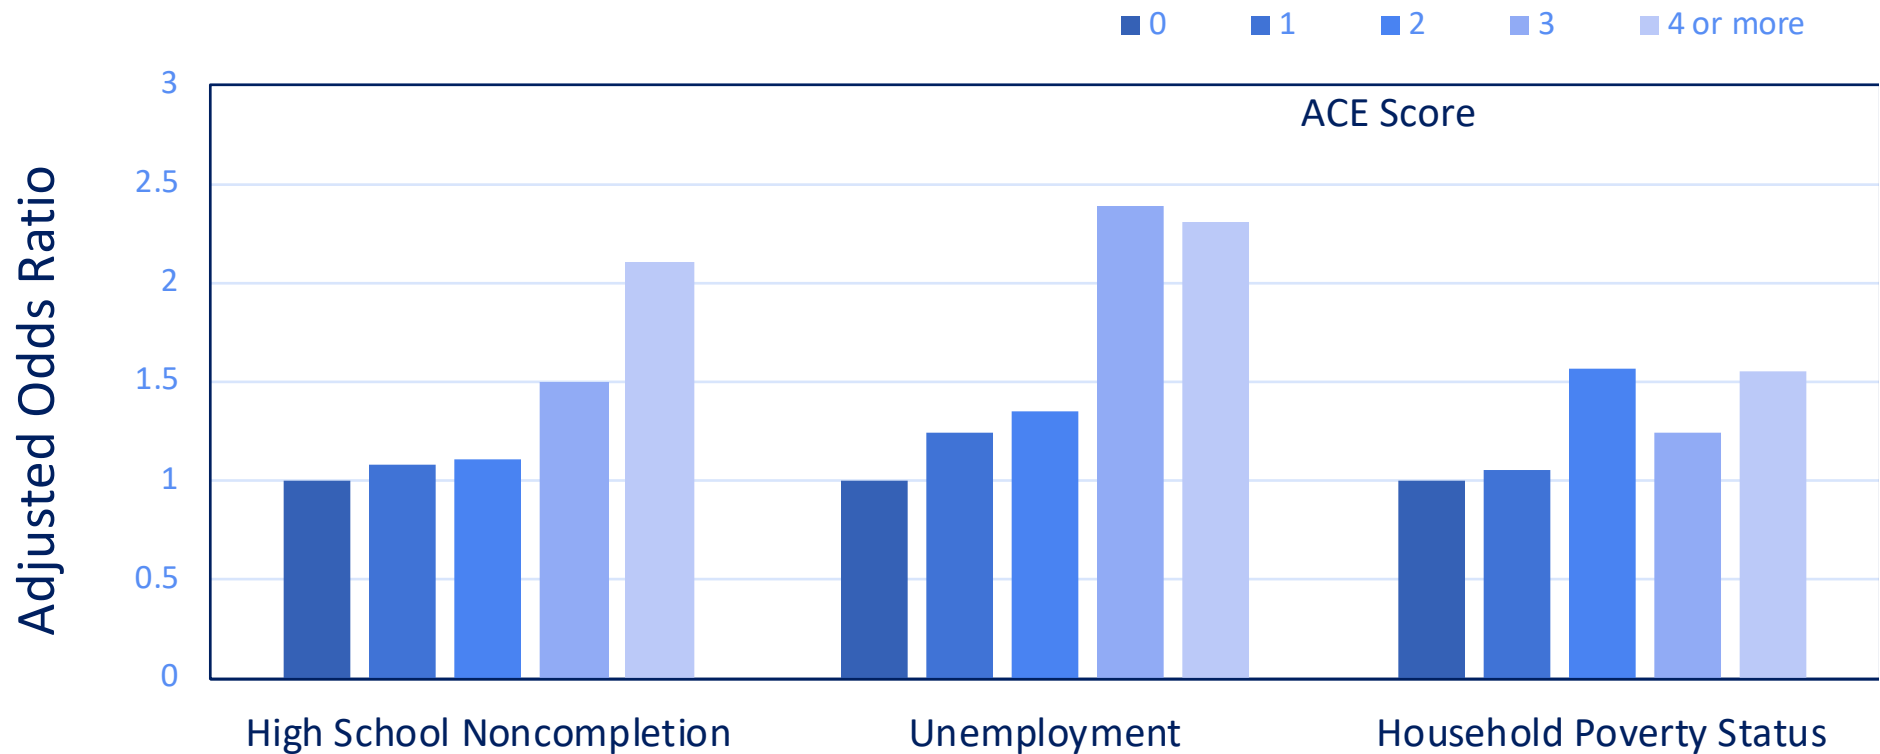

-Dong, M et al. *Circulation*. 2004;110:1761–1766.

ACE Score and Suicide Attempts

-Dube et al. *JAMA*. 2001;286:3089–3096.

ACE Score and Life Potential

The power of prevention

Preventing ACEs in future generations could reduce levels of:

Early sex
(before age 16)
by 33%

Unintended teen pregnancy
by 38%

Smoking
(current)
by 16%

Binge drinking
(current)
by 15%

Cannabis use
(lifetime)
by 33%

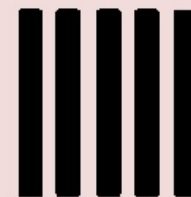

Heroin/crack use
(lifetime)
by 59%

Violence victimisation
(past year)
by 51%

Violence perpetration
(past year)
by 52%

Incarceration
(lifetime)
by 53%

Poor diet
(current; <2 fruit & veg portions daily)
by 14%

Preventing ACEs
requires understanding why
some children and families
are at greater risk than others.

Strategies to Prevent Child Abuse & Neglect

5

Strengthen economic supports for families

Change social norms to support parents and positive parenting

Provide quality care and education early in life

Enhance parenting skills to promote healthy child development

Intervene to lessen harms and prevent future risk

Source: Fortson, B. L., Klevens, J., Merrick, M. T., Gilbert, L. K., & Alexander, S. P. (2016). *Preventing child abuse and neglect: A technical package for policy, norm, and programmatic activities*. Using Data to Inform Solutions: State Examples

- **Wisconsin**

- Examining ACE “Hotspots”
- Added Poverty and Neglect Items to BRFSS
- Oversampled AI/AN Population

- **Washington**

- Legislators changed the definition of work participation for TANF recipients
- Juvenile offenders needed additional support to mitigate future adverse outcomes

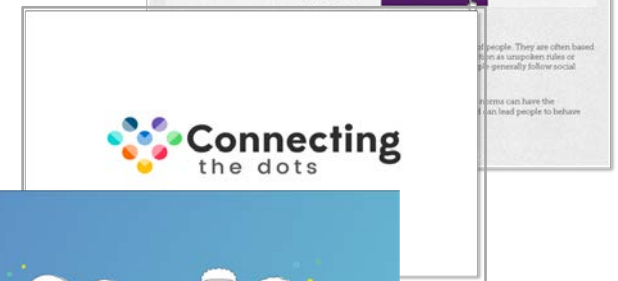

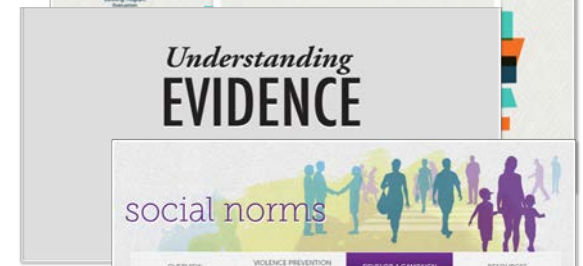

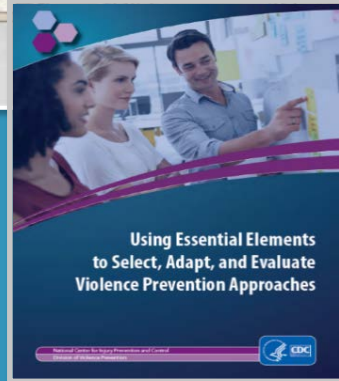

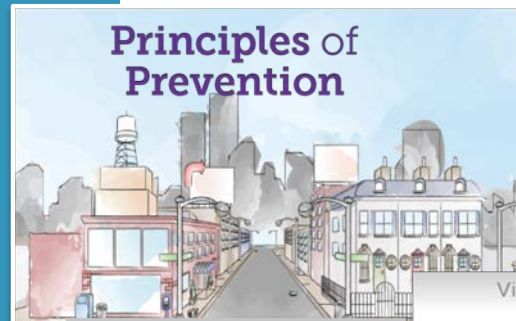

Making the Case:

Engaging Businesses

Resources
and Tools

Violence Education Tools Online (Veto Violence) – <https://vetoviolence.cdc.gov>

Working together to make a difference

- Public health
- Education
- Government (local, state, federal)
- Social services
- Business/labor
- Health services
- Justice
- Housing
- Media
- Non-governmental organizations such as rape crisis centers, SV and DV coalitions

“One of the most powerful ways to change the world is to make it better for kids.”

Building Community Resilience: Process of Assessment, Readiness, Implementation & Sustainability

The Pair of ACEs

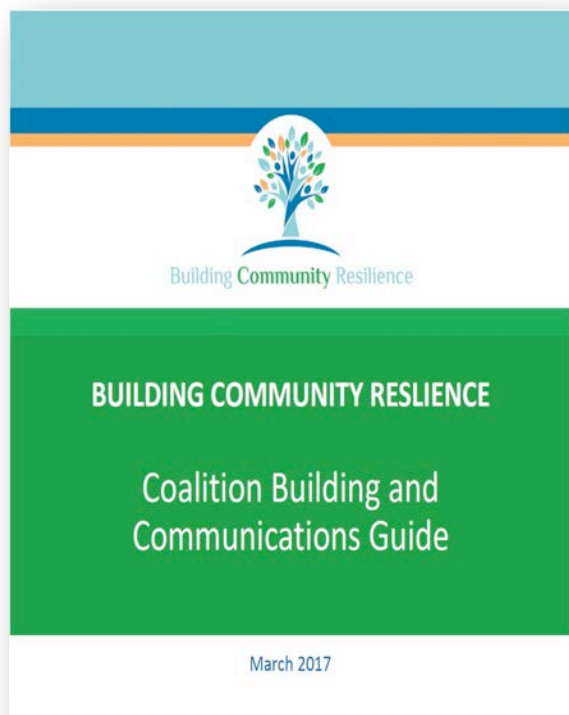

Adverse Childhood Experiences

Ellis, W., Dietz, W. (2017) A New Framework for Addressing Adverse Childhood and Community Experiences: The Building Community Resilience (BCR) Model. *Academic Pediatrics*. 17 (2017) pp. S86-S93. DOI information: 10.1016/j.acap.2016.12.011

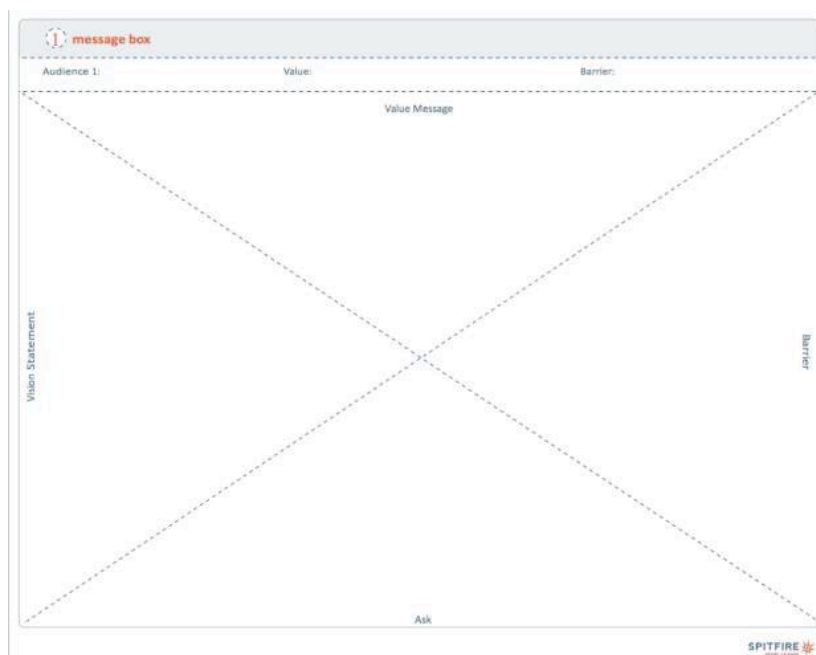

BCR Coalition Building & Communications Guide

- **Defines key terms and concepts**
ACEs, community resilience, SDH, trauma-informed care
- **Talking points**
“ACEs are an American public health problem.”
“Every system or organization that touches an aspect of a child’s life and family can contribute to community resilience.”

Crafting Messages for Specific Audiences

- ✓ **Smart Chart Message box*** helps articulate shared **values**, possible **barriers**, one create **ask**, and a shared **vision**
- ✓ Examples of messages for specific audiences: faith-based organizations, education, healthcare, etc.
- ✓ Guidance to connect to new possible partners

** Developed by Spitfire Strategies*

Finding Data to Help Tell Your Story

Browse by Survey & Topic

To begin your interactive data search:

- 1) Select a **survey**, **survey year**, and **geographic level**.
- 2) Select your desired **topic/starting point** (at-a-glance content maps are available to view/download at this step).
- 3) Select your **measure**.

These steps will direct you to a results page where you can compare across states, regions and by numerous subgroups.

1. Select a Survey, Year, and Geographic Area

Select a Survey

Select a Survey

Select a Year

Select a State/Region

7% of children without ACEs miss over a week of school
20% of children with 2+ ACEs miss over a week of school

Data Resource Center for Child & Adolescent Health:

www.childhealthdata.org

- **State-level data** on child & family ACEs, resilience, SDH, community, school, & family activities, neighborhood support, etc.
- Can select 25+ demographic topics to subgroup data by, including by **ACE exposure**.

The Annie E. Casey Kids Count Data Center:

www.datacenter.kidscount.org

- **State-level, select county and city data** on child & family economic wellbeing, education, health, community support, etc.
- Some data can be subgrouped by race/ethnicity, age, or gender.

Finding Data to Help Tell Your Story

County Health Rankings:

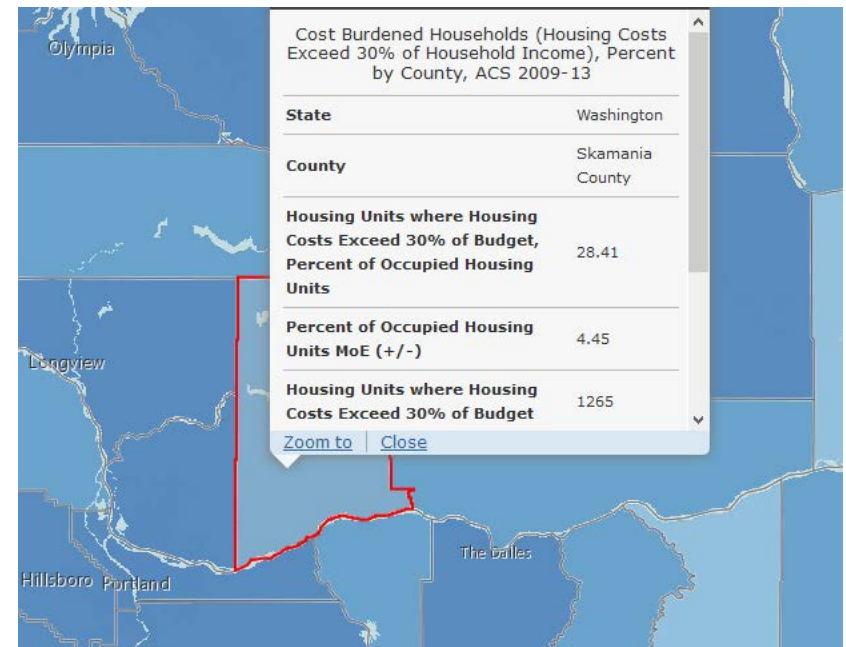

<http://www.countyhealthrankings.org/>

- **County and state-level data** on community violence, drug overdoses, access to healthy foods, children in juvenile justice, foster care, etc.

Community Commons

www.communitycommons.org

- Provides **county-level data** on topics such as unsafe housing, unaffordable housing, grocery store access, etc.
- Can pull data from long list of publically available data sources, will display data on maps

Communicating those Data...

Making the Scope Accessible:

- ✓ Consider selecting a **reference point** commonly known within your community
- ✓ *For example: “the number of children in our city who have experienced two or more traumatic experiences would fill up our XYZ stadium three times”.*

Highlighting the Inequity of Impact:

- ✓ Several data sources allow users to **break data down by race/ethnicity, income, SHCN, etc.**
- ✓ *For example: highlight the % of children of color, % of low-income children, or % of CSHCN in your state impacted by ACEs, as compared to all children.*

Communicating those Data...

Know Your Audience:

- ✓ Think about what topics would persuade your audience, and explore the data which exist on these topics.
- ✓ Ex: for education champions, **explore education indicators which exist** (missed school days, school readiness).

No Data Without Stories:

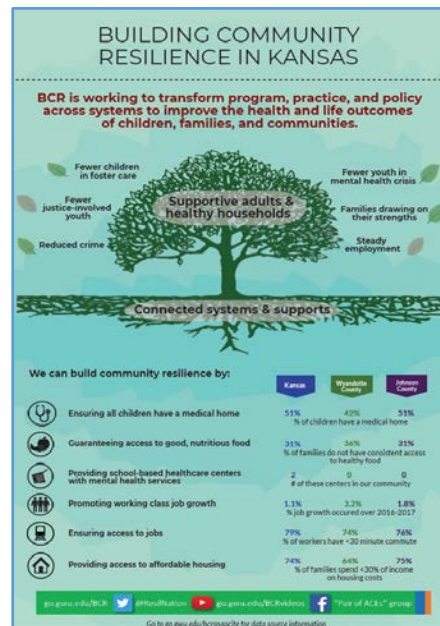

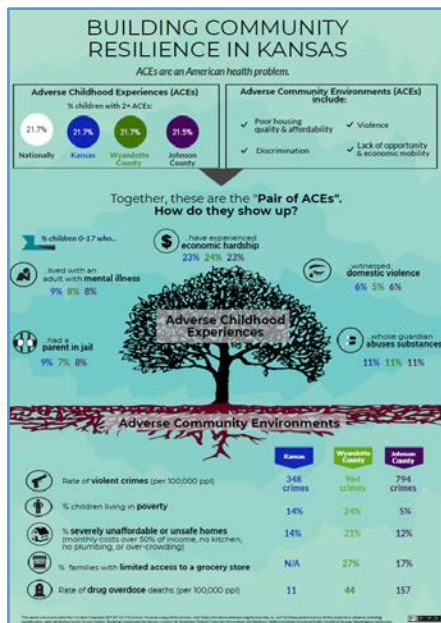

- ✓ Decisions are usually made on an **emotional level**, and **data are then used to rationalize these decisions**.
- ✓ Therefore *...data should always be tied to personal stories*.

Using Simple Visuals:

- ✓ Find a way to discuss your data simply – if it's not distracting, consider using a graphic to illustrate your point.

Using Data & Visuals to Tell Your Story

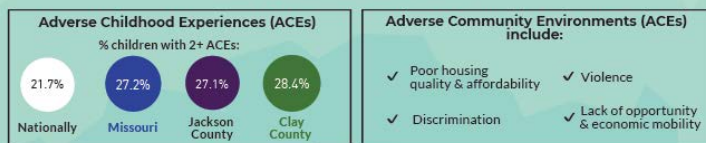

- **Visuals** draw new partners in; make complex ideas more accessible.
- Power in telling both an adversity and a **resilience story**.
- Examples and templates at go.gwu.edu/bcr.

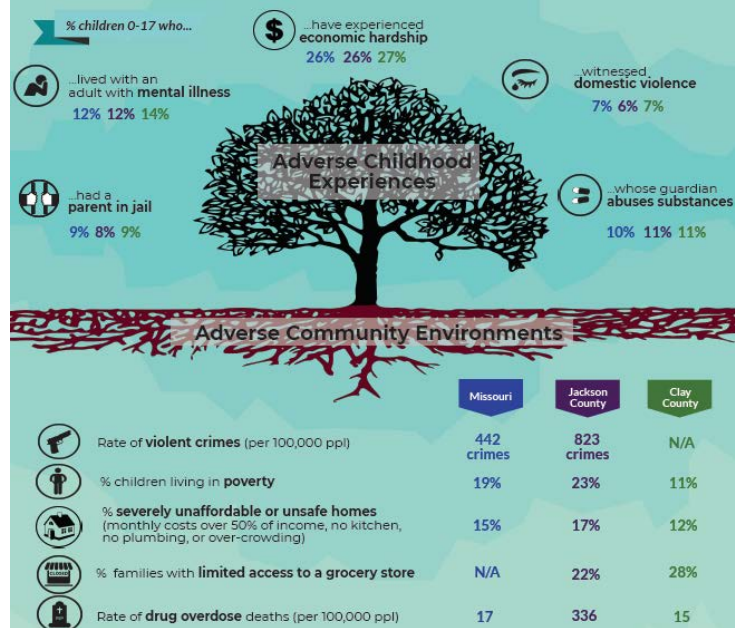

BUILDING COMMUNITY RESILIENCE IN MISSOURI

ACEs are an American health problem.

Together, these are the "Pair of ACEs".
How do they show up?

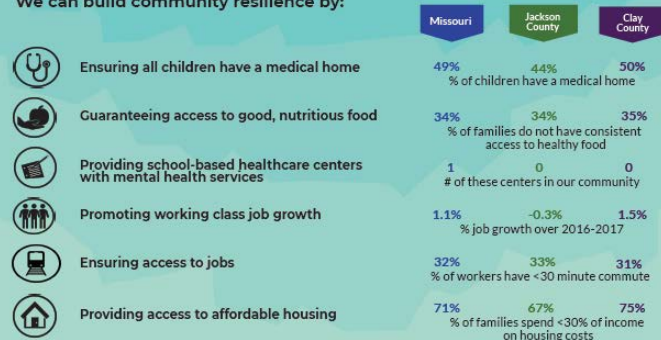

BUILDING COMMUNITY RESILIENCE IN MISSOURI

BCR is working to transform program, practice, and policy across systems to improve the health and life outcomes of children, families, and communities.

We can build community resilience by:

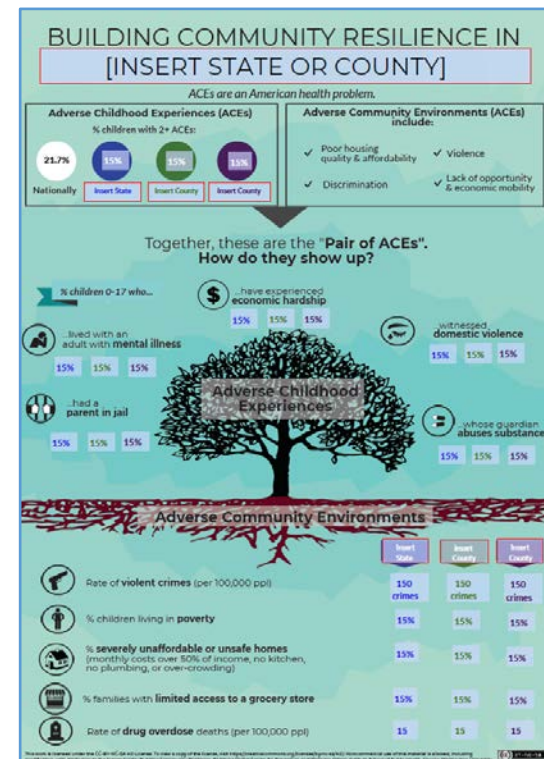

go.gwu.edu/BCR @ResilNation go.gwu.edu/BCRvideos "Pair of ACEs" group

Go to go.gwu.edu/bcrsnapcite for data source information.

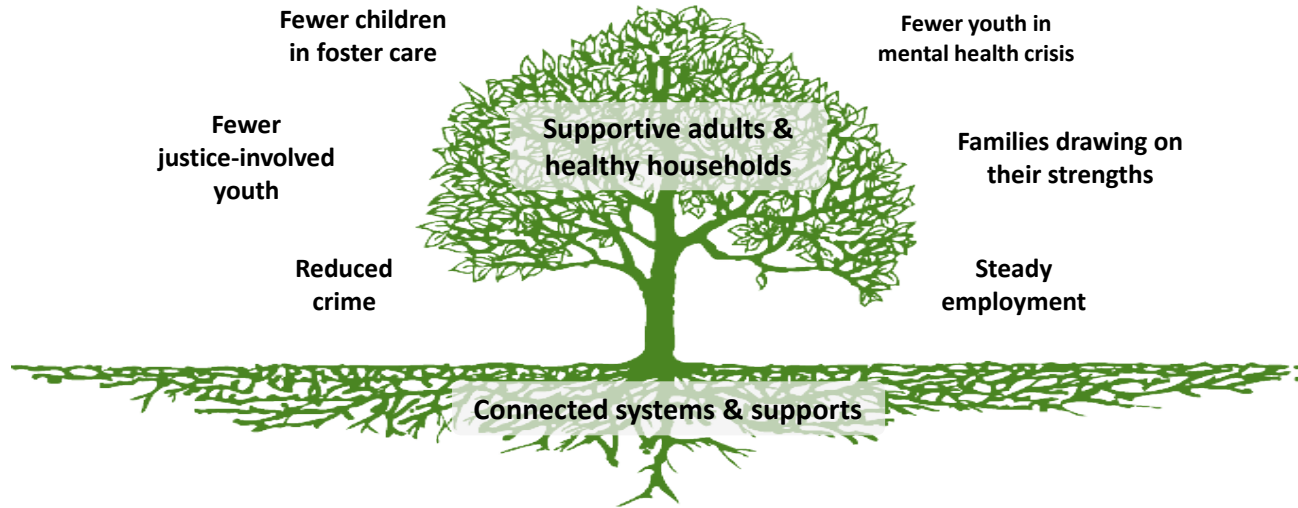

How Do I Customize this to My Community?

- A free, customizable version of this infographic is available at go.gwu.edu/bcrinfographicdata
- Templates are fillable **PDF forms** with space to include your state and county data
- All BCR tools are available at go.gwu.edu/bcr.

What Resilience Looks Like

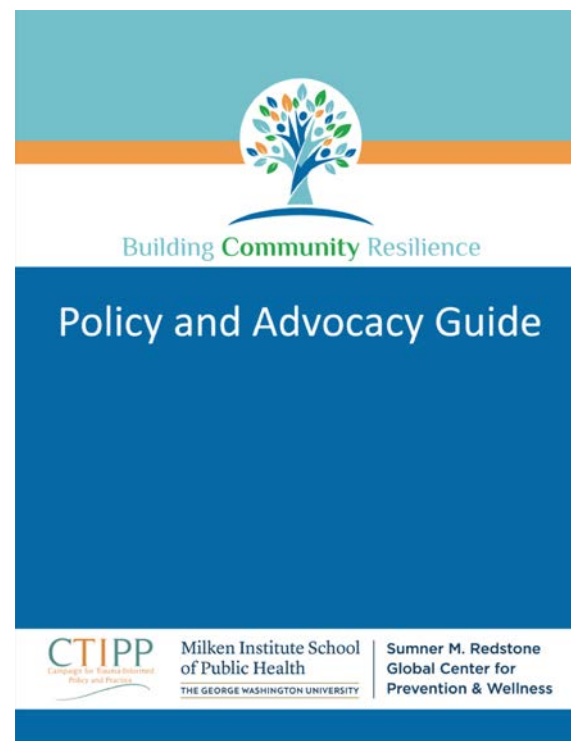

BCR is working to transform programs, practices, and policies across systems to improve the health and life outcomes of children, families, and communities.

BCR Policy & Advocacy Guide

Delivering Your Message

Remember: Politicians love stories, especially about constituents; but staff need the data. Make sure you are speaking to both audiences.

1) Issue Statement

2) Hook

*In the schools we're working in, **attendance and test scores are up** since we **co-located mental health services** and made our school trauma **informed**. Let me tell you a story about **a student named John...**"*

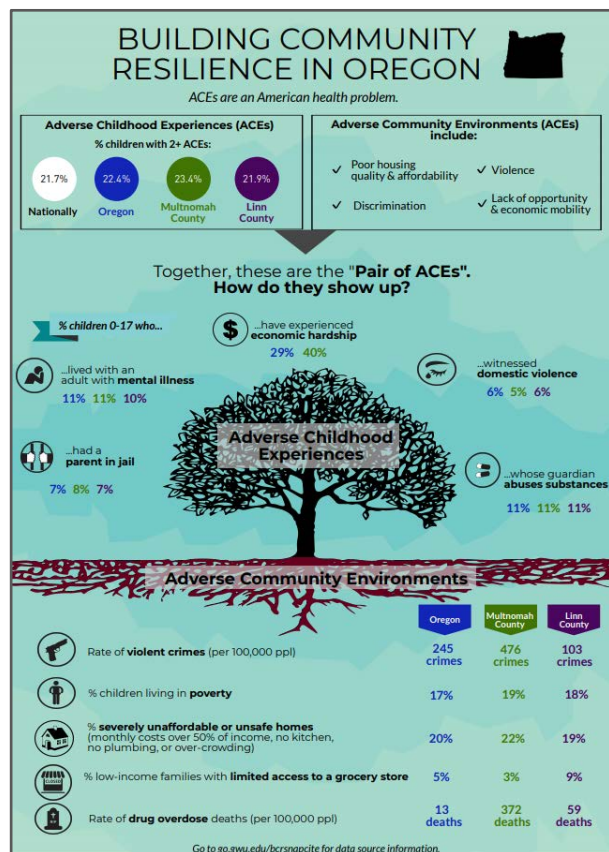

3) Solution

*Our program is reducing absenteeism in our schools, but **its reach is limited to our school...***

4) Ask

Policy version of the template is available at go.gwu.edu/bcrinfographicpolicy.

Using Data to Engage Stakeholders

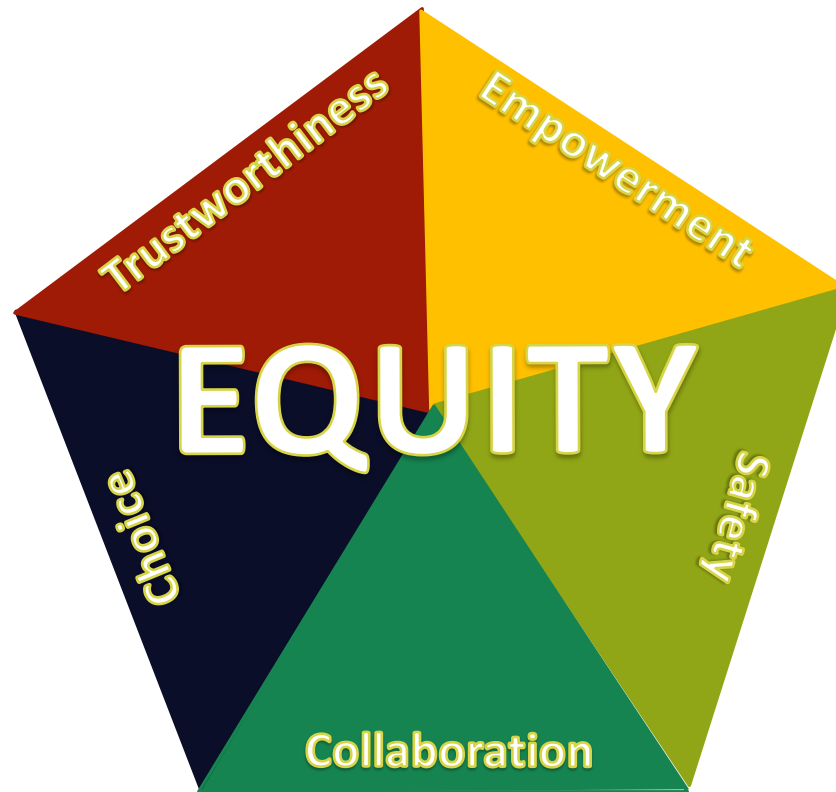

Alive and Well Communities **activate communities to heal.**

We do this by:

- **Elevating community wisdom**, centering those who have experienced trauma as leaders of the work.
- **Disrupting systemic oppression** and responding to the impact of historical trauma.
- **Acting with urgency**, not waiting for another day or generation.
- **Leading innovative solutions** based on the science of trauma, toxic stress and resiliency.

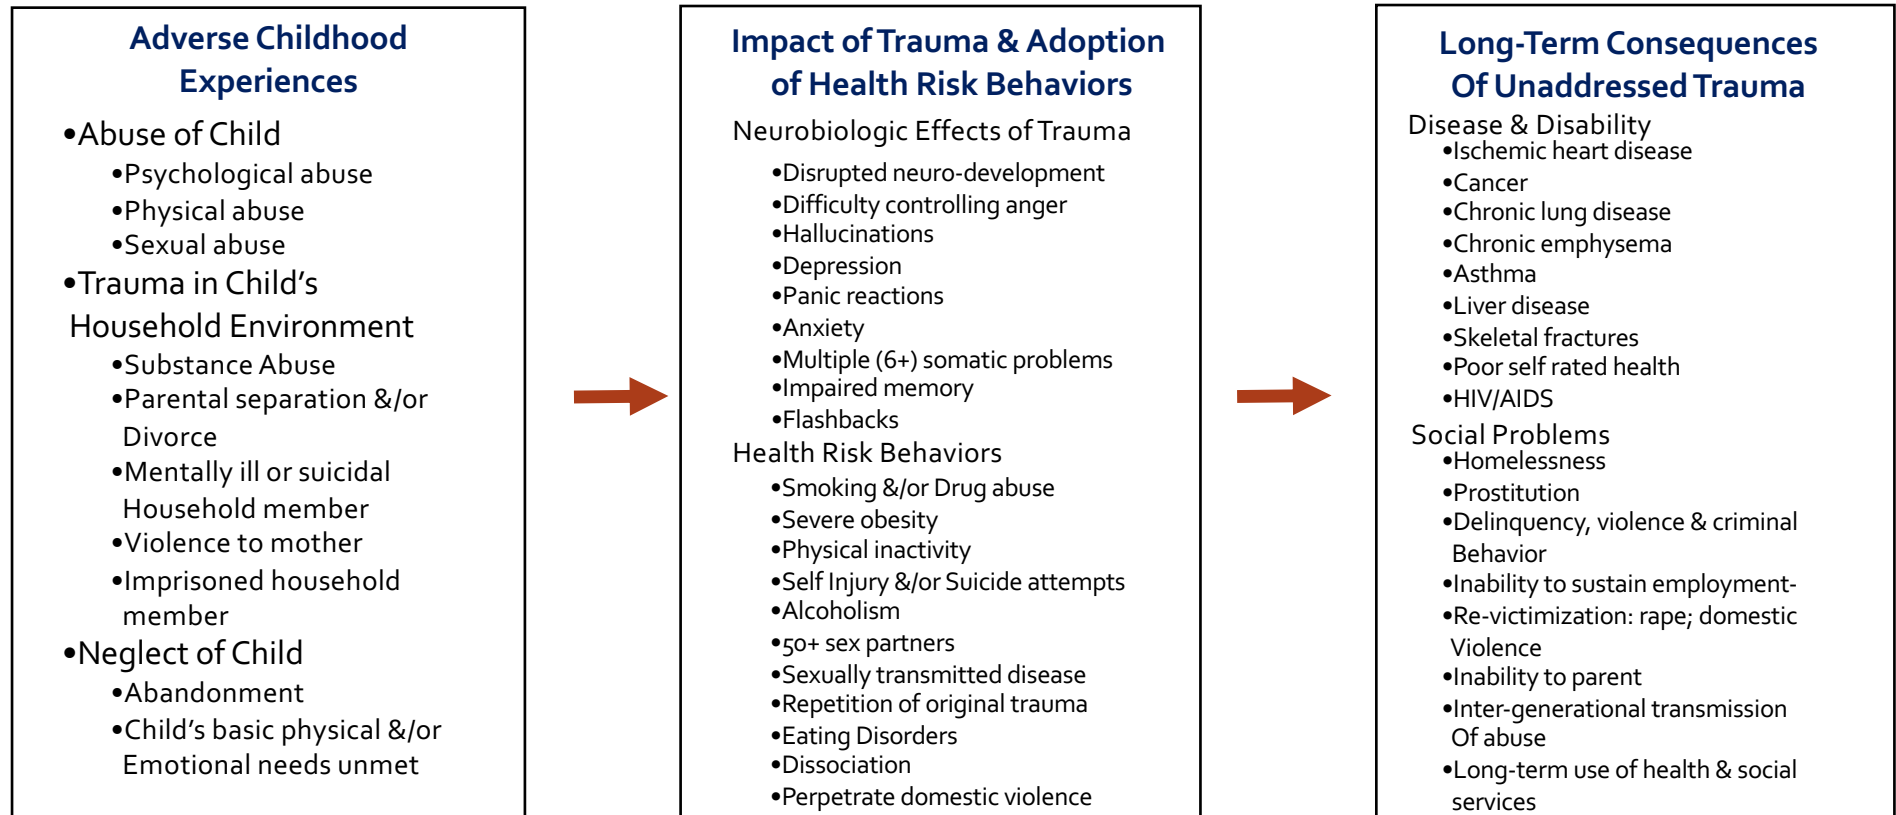

The Core Principles

Adverse Childhood Experience (ACE) Study

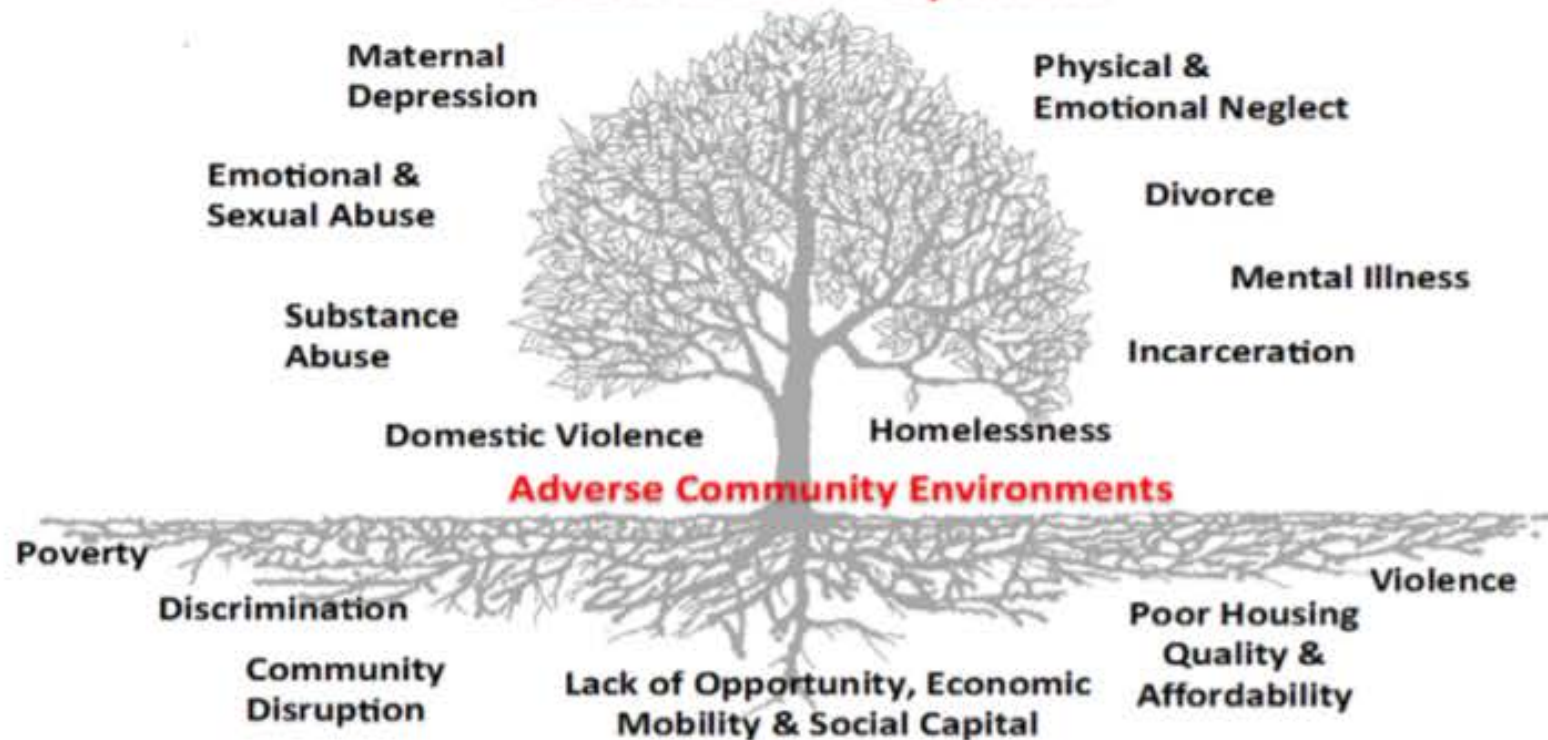

Without intervention, adverse childhood events (ACEs) may result in long-term disease, disability, chronic social problems and early death. Importantly, intergenerational transmission that perpetuates ACEs will continue without implementation of interventions to interrupt the cycle.

Adapted from presentation Jennings (2006). The Story of a Child's Path to Mental Illness.

What We've Heard: Community Consultants' Evaluation Report

94% of the interviewees described an actual behavior change that improved their own emotional wellbeing and/or that of someone else

The most frequent behavior changes mentioned included improving self-care practices and recommending the workshop to friends and family

68% of interviewees reported a change in attitude about someone they know who has experienced toxic stress and/or trauma

Of those who did not endorse a change in attitude, 50% said that their attitude had already been positive before the workshop, but their existing attitudes and knowledge were reinforced by the CEWs
